

bigdada®

Release 2.0

bigdada® is a collection of proven solutions as a service for supply chain visibility & security. The solutions deliver actionable intelligence analyzing data from internet of things (IoT) to solve problems identified by customers.

Delivering proof of value on first use:

- ✓ Ocean ports cargo security & visibility
 - Import/Export logistics from/to ports (Grains, Fertilizer, Chemicals, Minerals, Containers, ...)
 - Theft/Cargo diversion monitoring
- ✓ Chassis/Flatbed/Trailer/Container monitoring.
- ✓ Asset utilization & operations efficiency
- ✓ Asset monitoring, rescue & recovery
- ✓ Homeland security
- ✓ Just-in-time logistics for manufacturing
- ✓ Cold-chain monitoring
- ✓ Food chain lifecycle logistics
- ✓ Cross-border logistics security & visibility

bigdada® solutions as a service:

- Proven solutions: reduce your deployment risk.
- Integrated solution: comprehensive security and visibility.
- Cloud-based: no software installation required.
- Automated process: reduces human touch and manual data entry.
- Non-intrusive: no disruption to existing processes or systems.
- Easy to use: requires no new skills, training or resources.
- Cost efficient: flexible pricing.

Supply chain visibility and security as a service
